

Chocolate Resting Stock Tank

Chocolate Resting Stock Tank

- It is the equipment that allows the chocolate to rest, stock and transfer the product to the desired place.
- Made of stainless steel.
- The machine has a water and insulation wall.
- The mixer motor of the machine runs-stops at set times, thus saving electricity.
- Mixer control and heat control settings are available in the panel.
- There are twin covers fixed with hinges and shock absorbers on both sides of the machine.
- Grinding powdered sugar is conveyed by a spiral system.
